

AGSS TERMINAL UNITS FOR ANAESTHETICS GAS SCAVENGING SYSTEM

AGSS TYPE 1 terminal units are conceived and realized according to the directive 93/42/EEC and related norms ISO 7396-2, EN 9170-2, EN 737-2.

AGSS TYPE 1 terminal units can be mounted either in flush mounting boxes or in surface mounting boxes or in electro-medical devices such as bed-head units and ceiling pendants.

AGSS TYPE TERMINAL UNITS FOR ANAESTHETICS GAS SCAVENGING

They are constituted by:

- Brass base-block complete diam. mm 16 tube
- Nickel-plated brass terminal unit with gas specific head complying with norm ISO 7396-2 and 9170-2 complete with de-blocking nut with gas identification label.
- Flow adjustment system for network setting.

CODE	DESCRIPTION
UTEA - 0001	AGSS TYPE 1 terminal units for anaesthetics gas scavenging complete of base-block with welding pipe diam. 16 mm

CODE	DESCRIPTION
21400012	CARD for the AGSS unit status, for blowers units

WORKING PRESSURE	WEIGHT
-150 m bar (max)	Kg. 0,330
